

Cleco LiveWire I-Wrench for Production

Your smart and flexible Torque & Angle Wrench

Our Cleco LiveWire™ I-Wrench is a true all-around production tool to meet your flexible manufacturing needs. It is the perfect tool for advanced threaded tightenings. Additionally, it is suitable for your production line, enabling you to utilize both torque and angle tightening strategies.

The patented measuring system for the angle of rotation, the navigation by color display with touch screen or navigation buttons, the long battery life of the rechargeable battery of nine hours and the large memory capacity of 1 GB for 20,000 values or 20,000 curves or 1,000 parameter sets make the Cleco Live Wire I-Wrench the most flexible and versatile wireless torque & angle wrench available on the market.

You can operate the wrench via mPro400GC (Global Controller), PC /HMI (mProRemote Software), directly to server or via remote. Your data and curves get transmitted to the Global Controller by 2.4 and 5.0 GHz WIFI. You can realize torque control with angle monitor respectively angle control with torque monitor with unbelievable accuracy: +/- 0.5% deviation between 20 and 100% of the torque capacity, +/- 1.0% deviation between 10 and 20% of the torque capacity and +/- 0.5° display deviation of the angle.

You can order the Cleco LiveWire I-Wrench in different standard configurations. You choose between Tools with or without Barcode Reader, rubber protection, head detection and WIFI module come automatically with the tool. Easily build your torque & angle wrench with our nomenclature. Additionally, we offer a variety of accessories such as tool recognition programming unit, tool charging cradle, additional battery, external battery charger, USB cable or dual access point.
